

Pacific Northwest Landscape Calendar
Landscape Maintenance Activities Performed Each Month

	January	February	March	April	May	June	July	August	September	October	November	December	
Turf Fertilization	West of the Cascades	TG 20-3-7 Cool Season		Optimal: TG 24-2-9 w/ 50% Meth Urea/PSCU or TG 23-2-10 w/ 50% PSCU (TG 16-3-8 acceptable)				TG 21-2-15 Winterizer			TG 20-3-7 Cool Season		
	East of the Cascades	Fertilizing late in winter can leave tissues susceptible to freeze damage		TG 16-3-8 Quick Green	Optimal: TG 24-2-9 w/ 50% Meth Urea/PSCU or TG 23-2-10 w/ 50% PSCU		Avoid fertilizing in excessive heat		TG 21-2-15 Winterizer				
Seed & Sod	Overseeder Perennial Rye or Surge Mix			Seed + TG 12-8-6 *Fall seeding preferred					Seed + TG 12-8-6 *Fall seeding preferred				
Aeration & Dethatching	Timing			Spring Dethatching					Fall Aeration				
	Notes			Ideal time to incorporate an organic (Sanctuary, Mycorrhizae) to stimulate repair					Ideal time to incorporate an organic (Sanctuary) or soil amendment (Field & Fairway)				
Ornamental Fertilization	General Maintenance			TG 14-14-14 Plant Pro Plus (Spring or Fall)					TG 14-14-14 Plant Pro Plus (Spring or Fall)				
	Annual Care			TG 14-18-14 Annual Booster									
	Supplemental Iron	TG 9-9-9 High Iron (Granular) or Iron Max AC (Liquid)											
	New Install				TG GroPaks 20-10-5 for new trees and shrubs; Mycorrhizae for seasonal color					TG GroPaks 20-10-5 for new trees and shrubs; Mycorrhizae for seasonal color			
Pre-Emergent Weed Control	Landscaped Areas (Granular)			Snapshot (broad spectrum), Oxadiazon, or Dimension					Snapshot (broad spectrum), Oxadiazon, or Dimension				
	Landscaped Areas (Liquid)			Proflaminate or Surfian					Proflaminate or Surfian				
	Lawns (+Fertilizer) *Adjust standard fertilizer applications			TG 15-3-5 w/ Dimension					TG 12-4-16 w/ Barricade *If aerating, apply pre-emergent				
Post-Emergent Weed Control	Broadleaf Control + Fertilizer *Adjust standard fertilizer applications			TG 15-3-5 w/ Viper					TG 15-3-5 w/ Viper				
	Broadleaf weed control			Speedzone (Q4 for Broadleaf AND Grassy weed control in turf)					Speedzone (Q4 for Broadleaf AND Grassy weed control in turf)				
	Grassy weed control in Landscaped Areas			Fusilade + TG Non-Ionic Surfactant					Fusilade + TG Non-Ionic Surfactant				
	Moss Control	Ferrous Sulfate						Ferrous Sulfate					
	Non-Selective	Roundup QuikPro		Roundup ProMax or Roundup QuikPro				Roundup QuikPro					
Insect & Mollusk Control	Grub and sod webworm (lawn moth larva) control					Imidacloprid (Merit)							
	Aphids, Mites, Scales (ornamental pests)	Dormant Oil (Destroy Overwintering Eggs)		Azatrol				Apply when pests expected to appear, at 7-10 day intervals or as situation demands. Apply with TG Water Conditioner for proper 5-7 pH.					
	Snails & Slugs	Sluggo - Most effective when applied during foggy, more humid conditions (when they are most active).											
Disease Control	Powdery Mildew, Rust, Brown Patch, Black Spot (Roses), Leaf Spot					Propiconazole (or Fungi-Fighter)							
	Pythium/Root Rot, Downy Mildew, Fire Blight	Fosetyl-AI (or Agri-Fos) Ensure planting areas have proper drainage.		Fosetyl-AI (or Agri-Fos) Ensure planting areas have proper drainage.				Fosetyl-AI (or Agri-Fos) Ensure planting areas have proper drainage.					
	Leaf Curl, Shothole, Brown Rot (on stone fruits)	Liquid Copper											
Other	Soil surfactants				Aqueduct to treat localized dry spots
